Numeracy & Literacy Achievements

Fathiya Abdow - Student

The Face To Face Connections project works with young people who are marginalised for a variety of reasons. Fathiya Abdow is one such young person who has received support at a time when she was not sure how she would continue her education. As a late arrival to the country Fathiya was unable to secure a school place and so required support

to continue with her education. The staff and young people at the project have found her to be very friendly and also softly spoken. Fathiya has now completed several topics from the OCR CLAIT 2006 syllabus. She has also successfully completed examinations in Numeracy at Entry Level and Level 1. She took time out to have a lovely baby daughter as pictured below.
